ABOUT ME

Frontend Developer specializing in React, Next.js, TypeScript, and Tailwind CSS. I build scalable web products, dashboards, configurable widgets, and AI-enabled interfaces for remote startup teams. I focus on UX, performance, maintainable code, and fast product iteration.

WORK EXPERIENCE

Founding Developer

Stealth Startup | Apr 2025 - Present | Freelance

- Build product features for an intelligent retail inventory platform, helping customers replace spreadsheets and intuition with actionable data.
- Develop React and TypeScript interfaces connected to Node.js, Express, PostgreSQL, and Python-based data workflows.
- Integrate Claude and Gemini into the product to accelerate analysis, generate insights, and improve the customer experience.
- Built ABC analysis and replenishment features that helped key products grow between +34% and +827% in revenue after 8 months.

tomorrow.media

Frontend Web Developer | Jan 2025 - Present | Freelance

- Build reusable views and UI components with React and Tailwind CSS for digital media products.
- Progressively refactor the codebase toward Next.js to improve performance, maintainability, and SEO.
- Collaborate with design and backend teams to ship user-focused product features.
- Ship frontend work across multiple client projects, from digital media products to acelerIA, a public-sector AI education platform for UTEC.

Capital Rights Law / YesLawyer

Frontend Developer | Jul 2025 - Jun 2026 | Contract

- Contributed to YesLawyer, a legal-tech platform for labor case management, consultations, demand letters, filings, and settlements.
- Implemented frontend interfaces, integrations, and automations using Next.js with Django REST Framework, PostgreSQL, Redis, and Celery.
- Improved operational reliability through workflow optimization, automated validations, and AI-assisted end-to-end testing.

HackCTF

Frontend Web Developer | Jul 2024 - Feb 2026 | Contract

- Developed new frontend features using React, Tailwind CSS, and modern component patterns, with a focus on accessible and high-performance interfaces.
- Led the migration toward Next.js, improving project structure, rendering performance, and SEO.
- Integrated third-party libraries and managed VNC-based environments to support product workflows and development operations.

Deflection.ai

Lead/Frontend Web Developer | Jan 2024 - Sep 2025 | Contract

- Built dashboards and configurable UI widgets for conversational AI products using Next.js, React, Tailwind CSS, and TypeScript.
- Integrated Stripe payment flows and customized frontend experiences across multiple AI-based products.
- Led frontend quality through code reviews, mentoring, and collaboration with CEO, CTO, backend, and AI teams.
- Contributed to product decisions and frontend architecture for scalable, maintainable user interfaces.

NextMed

Full-stack Developer | Aug 2023 - Sep 2024 | Contract

- Built frontend features with Next.js and Tailwind CSS in direct collaboration with CEO and CTO.
- Maintained Python/FastAPI backend services, Celery background tasks, and payment integrations with Rebar, Stripe, and NMI.
- Managed AWS resources, API Gateways, and manual deployments in environments without CI/CD pipelines.

Desengo

Cofounder & Full-stack Developer | Jul 2023 - Jul 2025 | Freelance

- Built freelance web projects with a partner, covering discovery, frontend development with Next.js, Tailwind CSS, and Chakra UI, and backend work with Supabase, Express, or Nest.js.
- Managed client communication, requirements, implementation, and delivery across custom web projects.

Grupo Consultores de Empresas

Full-stack Developer | Apr 2023 - Aug 2023 | Contract

- Contributed to the migration of legacy systems into micro frontend architectures using single-spa, Angular, and React.
- Fixed bugs and maintained web/mobile applications using Angular, Nest.js, Ionic, and Capacitor.
